**Live a healthy, more enjoyable lifestyle... with the help of dental implants.**

**Dental Implants...are they for you?**

**Do you experience any of these problems?**

- loose, poorly fitting dentures
- difficulty chewing
- difficulty speaking
- poor nutrition due to soft diet
- pain while eating
- avoidance of social situations

**...if so, then you may benefit from dental implants.**

## What is a dental implant?

A typical dental implant is a small cylinder placed into the jawbone, usually with minimal discomfort, that is used as support for the replacement of missing teeth. Implants can be used to support as little as a single tooth, multiple teeth, or to anchor an entire denture.

### Single Tooth Replacement

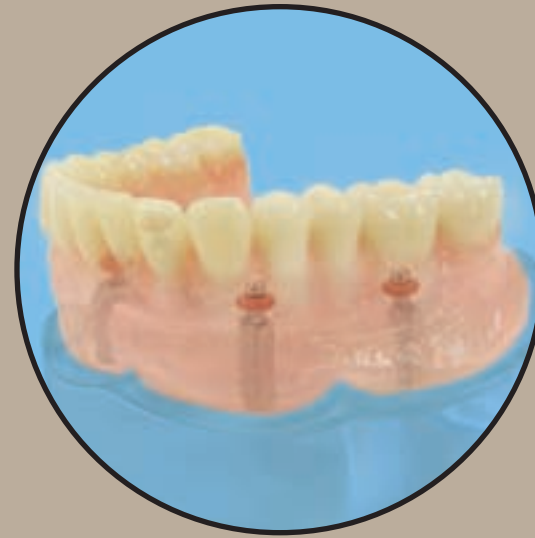

BEFORE

AFTER

## Can anyone have dental implants?

Implants are for almost anyone with missing teeth. Any person in reasonably good health is eligible for dental implants regardless of age – whether 18 or 81 – you can benefit from dental implants. In fact, dental implants will enhance your health by improving diet and nutrition. Besides, don't you deserve the right to eat normally – whatever your age?

### O-Ring Denture Attachments

## Are dental implants affordable?

Many people can benefit from solid, implant-supported teeth for far less than traditionally available. If you are missing teeth, Dental Implants can be one of the best and lasting investments you will ever make in your life *and lifestyle*. And depending upon the number and type of implants...surprisingly affordable! With payment options for as little as a few dollars a day, you can again smile and laugh without fear of embarrassing dislodgement. And best of all, you can once again eat...

***the same as with your natural teeth!***

## Who are we?

Provenzale Dental is a General Dentistry practice with a special emphasis on Dental Implants. This means that we provide all phases of implant treatment at a substantial savings – rather than requiring you to go to different doctors and offices – so all of your treatment can be performed by one doctor, start to finish, at our state-of-the-art facility.

For more information on dental implants or any other dental procedures, or to schedule an appointment...just call!
